#### Save the Date!

The Trustees are planning an all-church work day on Saturday, April 20th. We're looking for a good turn out to spruce up the church grounds this spring.

Are you new to AUMC or attending for a while, but ready to make some connections: How about trying a three week session called, "Simple Group"? We will focus on three simple questions: "Who am I?", "Who is God?", and "Who Are We Together?" Sundays - April 14th, 21st, and 28th at 9:30 am in Room 111. Anyone is welcome to come, but please contact Michele Imler at [micheleimler@gmail.com](mailto:micheleimler@gmail.com) so that enough books/materials are prepared.

More Than a Book Club will be meeting on Monday, April 15th at 6:15 pm in the church Narthex to discuss *The Memory of an Elephant* by Alex Lasker. This epic saga is told from the perspective of an aging African elephant as he makes a last perilous journey to find the humans who rescued him as an orphan some fifty years before. Interwoven with his narrative are the tumultuous lives of the family that raised and then lost him. This timeless story is alternately heartwarming and heartbreaking, spanning East Africa, Great Britain and New York from 1962 to 2015. This relatively short book packs in an unforgettable story and it will be a great book for discussion.

Alex Lasker was a screen writer for 30 years but finds far more satisfaction in writing novels. Very glad he wrote this one.

## ***From the Health Ministry Team...***

### **Water is an Essential Nutrient!**

Are you getting enough?

Water is essential to good health. Some of the need depends on how active you are and the climate you live in as well as your health. No single formula fits everyone.

Water makes up 50% to 70% of your body weight. All of your cells need water to work. Water is present in all your body fluids including saliva, blood, urine, sweat, and joint fluid. No living thing can survive without water. Water is lost in urine, sweat, and even when you breathe out. It is important to replace what you lose by drinking water.

Every cell, tissue, and organ in the body needs water to work. For example, water:

- Rids the body of waste through urination, perspiration, and bowel movements
- Keeps your temperature normal
- Lubricates and cushions joints
- Protects sensitive tissue

Severe dehydration can lead to confusion, fainting, the inability to urinate, a rapid heartbeat, and rapid breathing. This is life-threatening condition and medical help should be sought right away. Intravenous fluids may be required for body fluids.

Signs of dehydration are feeling very thirsty and having headaches. Your mouth and skin may feel very dry. Your urine may be darker for your body to conserve water.

Dehydration is not the only condition that being properly hydrated avoids. Recent research has found that middle-aged people who were not adequately hydrated were more likely to develop chronic diseases such as heart failure, diabetes, chronic lung disease, and dementia. They seemed to age faster and die younger.

Diseases like diabetes or kidney disease as well as some medications can cause you to urinate more often. Fluids can be lost in throwing up or having diarrhea or a fever. In these circumstances more water needs to be ingested to avoid becoming dehydrated. Just a warning, too much water can be consumed. The kidneys cannot handle the excess water so the sodium content of your blood becomes diluted. Hyponatremia is the name for this condition. It can become life-threatening.

Nine cups of fluids are recommended for women and thirteen cups for men. The amount you need per day depends on many factors such as age, where you live, and your body weight. It is ideal to get your fluids from water or other low-calorie beverages such as plain coffee or tea, or sparkling or flavored waters. Milk and milk alternatives or 100% vegetable juice are good choices. Drinks such as soda and sports drinks can add many calories and little nutrition to your diet.

Making water your beverage of choice is the best choice. Drink a glass of water:

- With each meal and between meals
- Before, during, and after exercise
- If you feel thirsty

# PLANT, WATER, GROW

Building a faith community takes work. How did the church in Corinth come to be?

Directions: Use the code to fill in the words and complete a teaching of the apostle Paul.

## KEY

I \_\_\_\_\_ the \_\_\_\_\_, Apollos \_\_\_\_\_ it,

but \_\_\_\_\_ has been making it \_\_\_\_\_.

So neither the \_\_\_\_\_ who plants nor the

\_\_\_\_\_ who waters is \_\_\_\_\_,

but \_\_\_\_\_, who makes things \_\_\_\_\_.

1 Corinthians 3:6-7, NIV

Answer: planted, seed, watered, grow, God, grow, one, anything, only, God, grow

SOMETHING  
OLD,

Something New

Use scrap paper to fuel  
new growth and make a gift  
that keeps on giving.

## What you need:

- Scrap paper
- Water
- Herb or flower seeds
- Blender
- Strainer
- Cookie sheet
- Towel
- Adult help

## What you do:

1. Tear the scrap paper into strips and place in a bowl. Cover the paper with water and let it soak overnight.
2. Pour the mixture into a blender and blend about 10 seconds.
3. Strain and squeeze the paper pulp to remove excess water. Place in a bowl.
4. Sprinkle seeds over the pulp and mix to incorporate them into the pulp.
5. Shape the pulp into a flat layer on the cookie sheet. Use a towel to soak up excess water. Allow the paper to dry completely.
6. Tear paper into shapes or fold into a card. You can plant the paper directly into soil. Water it and then watch your plants grow!

"Old gardeners never die. They just spade away and then throw in the trowel."
